TRAILWISE CHEVRON BAG. Our finest bag, the Chevron has been proven from the Himalayas to Alaska and Antarctica and in all the frozen regions of the world. Nothing was spared in design, construction or materials to make the Chevron the most efficient of all sleeping bags. Light, downproof water-repellent and extremely durable Tenaya nylon shell has a luxurious feel and will give years of service. A full 19" differential cut allows maximum lofting of premium white goose down for optimum weight/warmth ratio. Chevron baffles of strong nylon mesh are spaced at 5" intervals and slanted a full half-tube width for even greater efficiency. Generous contours and flared foot section assure unrestricted comfort while mummy pattern pares ounces from weight of bag. Draw cord hood. 72" double slider nylon zipper on right or left side. Colors are blue and orange. Supplied with waterproof stuffsack.

Chevron 102 will fit persons up to 5'10".

TRAILWISE SLIMLINE BAG. The form-fitting Slimline, our most popular bag, has been designed for the mountaineer or backpacker who must keep weight and bulk to a minimum. 13" differential cut allows maximum lofting of the white goose down, while slanting Chevron baffles stabilize the down more effectively than any other type of baffling yet developed. Shell is made of the finest water-repellent Tenaya nylon in orange or blue. Completely adjustable draw cord hood. A 72" double slider nylon zipper, available on either right or left side, provides great flexibility. The Slimline will keep the average person comfortable in normal summer temperatures in the high mountains and, with the increased efficiency provided by the use of a cover and thermal underwear, may also be used in comfort for winter camping. Slimlines may be ordered in matching pairs that zip together to form a double bag. Supplied with 7" x 18" or 9" x 18" waterproof stuffbag.

Slimline 902 will fit persons up to 5'10" and weighing about 160 lbs.

TRAILWISE sleeping bags will incorporate a superior new zipper in this year's product line. This nylon zipper runs smoother than earlier models and features two sliders which allow the zipper to be opened at either the head or the foot of the bag for greater temperature control. Customers wishing to purchase a new bag which they intend to couple with a previous model should so specify on their order and allow additional time for delivery.

TRAILWISE NORRLAND BAG. Cut full at shoulder and elbow section with roomy flare at the foot. Combines the freedom of a rectangular bag with the economy of weight and bulk found only in mummy styles. The shell and lining are of light, downproof Tenaya nylon. 5" differential cut allows full lofting of the white northern goose down. The baffles of nylon mesh are in the highly effective patented Chevron pattern. Right or left 72" double slider nylon side zipper provides efficient thermal control. Draft flap. Two Norrland bags may be zipped together for form a roomy double, even though the bags are of different lengths. Adjustable hood with drawcord. Colors are blue or orange. Supplied with waterproof stuffsack.

Norrland 184 will fit persons up to 5'8".

TRAILWISE COMBI BAG. For those who prefer a "rectangular" bag, this bag has a 5" taper from head to foot. Full length nylon zipper extends across foot section so that bag may be opened flat. 1.9 Ripstop throughout. Dark green outer shell with contrasting bright orange inner shell. Modified Chevron baffles set at 6" intervals. Filled with grey northern goose down. Will fit persons up to 6'4". Waterproof stuffsack included.

SCO185 — 32 oz. fill total wt. 76 oz. \$ 80.00

TRAILWISE DOUBLE MUMMY BAG. Accommodates two persons comfortably. Provides certain advantages over two single bags zipped together, i.e., less bulk and lower price. Shell is blue Tenaya nylon for lightness, luxuriousness, and durability. Strong nylon baffles are sewn in Chevron pattern. Fill is grey goose down. Superior individual thermal control is provided by two 72" side zippers with draft flaps and independent draw cord closures. Velcro fastening of center section between hoods permits opening of entire top of bag. Will fit persons up to 6'4". Supplied with 11" x 12" waterproof stuffsack.

TRAILWISE HOSTELER BAG. A bag designed for those who want an inexpensive down-filled bag that will also be light in weight, able to take rough usage, and serve a variety of purposes. We feel this bag is suited to the summer backpacker, climber, cyclist, and for winter use in lodge or hut. This bag is fully baffled. 6" differential cut. Straight cross tubes with nylon baffling. No stitched-through seams. Recommended for the slender person under 6' in height. Fill is grey goose down. 72" metal zipper. Fabric is downproof Ripstop nylon. Color is green. Supplied with 7" x 18" stuffbag.

SH105 — 20 oz. fill total wt. 43 oz. \$ 57.50

TRAILWISE DOWN-FILLED FOOTSACK/CHILD'S MUMMY BAG. When paired with a down-filled parka, the combination will serve as an emergency sleeping bag. Some may prefer to use this combination for an entire outing, thus saving weight while providing versatility. Also a superior child's bag for the young camper up to 4'2". Fully baffled; no stitched-through seams. Full 12" differential cut. Fill is grey goose down. No zipper. Fabric is Tenaya nylon, blue or orange. Supplied with 7" x 18" waterproof stuffbag.

SF106 — 16 oz. fill total wt. 26 oz. \$ 42.50

TRAILWISE SLEEPING BAG COVER. A departure from the traditional design, our new cover is designed for a multitude of uses. Rectangular in shape, it measures 44" x 89". Large enough to accommodate any Trailwise bag with room left over for clothing and other gear. Will also double as tarp or ground-sheet. Ripstop nylon, green or orange as available; bottom is waterproof.

SLEEPING BAG FACTS.

1. Each Trailwise bag has been carefully researched to arrive at an optimum weight of down filling. Most bags are offered in a heavy and light fill which we feel offers the practical limits of application. The addition of more down reduces the shell's efficiency and does not necessarily provide greater warmth. The Combi and Hosteler bags incorporate simpler shell design and are available in one fill weight only. For lower temperatures, a more sophisticated shell is indicated.
2. Sleeping bag temperature ratings are relative and should be used as an index of comparison between bags. The low temperature range of a bag depends on many variable factors: adequate ground insulation, humidity, wind speed, and most important, the metabolic rate and physical condition of the sleeper. There is considerable individual variation both in the ability of the body to produce heat and to tolerate cold. A hard day on the trail followed by an insufficient meal will lessen the body's ability to produce heat. Thermal underwear, sleeping bag cover, tent; all add greatly to the effective temperature range of a given bag.
3. Bag quality begins with the materials employed. Trailwise is particularly proud of their development of Tenaya cloth. The unusually high thread count (up to 146/inch) combined with a special finishing process make it virtually down-proof. Weight-to-strength ratio is excellent while the feel remains soft and luxurious. Tenaya cloth is exclusive with Trailwise and is used for all their best quality bags.
4. Goose down is universally recognized as the ultimate insulation produced by nature or man. Trailwise eschews the use of the more economical southern goose or waterfowl downs and employs only the highest grade prime northern goose down collected from mature geese and painstakingly processed to eliminate any feathers or other impurities.
5. Trailwise quality construction methods include sewing off individual chambers to completely stop down shift between tubes.

TRAILWISE TWO-MAN MOUNTAIN TENT. A light-weight two-man tent of basic design. Exceptionally rigid under storm conditions. Made of Ripstop nylon; supported at each end by angle poles set in nylon sleeves. Floor is 56" x 89", height 48". Tunnel door on rear panel with mosquito net. Center zipper closure on front panel, backed with zippered nylon mosquito screen, provides complete ventilation and protection against insects. Sewn-in floor extends 13" up side of tent and is made of Urethane coated fabric. With guy lines, shock rings, and carrying case. Colors: green or orange.

CLOGWYN CLIMBING NUTS. Beautifully designed with precision machining, these climbing nuts are a worthwhile complement to any piton selection. They are far lighter than pitons, being formed of high-strength aluminum, and they are easier to place and remove. Because of their method of placement, climbing nuts do not aggravate expanding flakes, and they work in cracks too shallow for proper piton placement.

HOW TO ORDER BOOTS

Please follow these directions carefully. The information requested below is essential for the fitting of your boots.

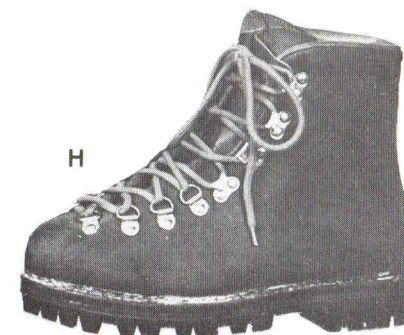

1. Put on the socks you intend to wear. Stand up on a piece of paper, having the weight of your body equally distributed on both feet. Holding a pencil vertically, clearly define the outline of each foot.
2. State your usual dress shoe size. Give both length and width for example 9-C.
3. Enclose the foot outline and your dress shoe size with your order.

NOTE: We guarantee a proper fit. Instructions for trial use of your boots will be sent with them. If the fit is incorrect, send the boots back to us with the coupon provided on the instruction sheet. A new pair of boots will be sent back to you postpaid.

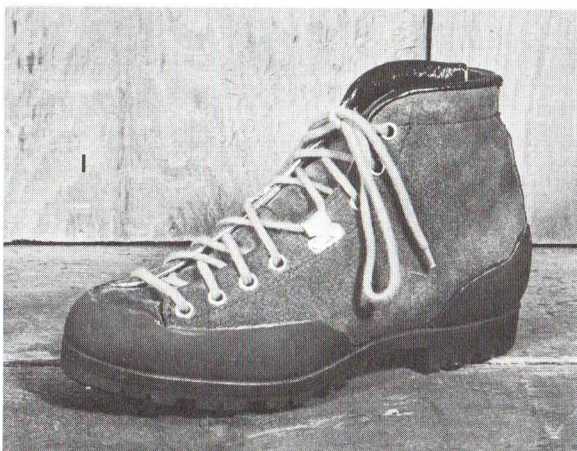

G MONTE ROSA. Developed in Europe for climbing in the Alps. Rough-out oil-tanned leather for abrasion resistance. Fully lined with chrome-tanned leather, backed with foam rubber around the ankle section, including tongue. The Vibram Montagna sole has no overhang, assuring good balance on rock and technical ice. Lacing hooks. Height 5½", plus 1" snow and scree collar. Sizes 5 to 12; widths A to D. **B105** ave. wt. 4½ lbs. \$ 39.00

H "RD" SUPER-GUIDE. A heavy-duty mountaineering boot with stiff sole. Tan, rough-out uppers with "double water-proof tanning." Used on many of the hardest climbs in the Alps and in North and South America. Upper is gusseted to keep out water and snow. Easy to get on. Good for rock climbing. Lace gripper. Lug soles. Sizes 6-13; medium width. **B403** ave. wt. 5½ lbs. \$ 43.00

I "RR" VARAPPE. Designed by Royal Robbins and manufactured by Galibier as a heavy-duty rockclimbing shoe, the Varappe has become the most popular and most versatile rockclimbing shoe in the United States. Rigid for edging and comfort in slings, yet sufficiently flexible to conform to sloping holds. Gripping device on lacing allows separate adjustment of lace tension for walking or hiking. Uppers are blue suede with a thickness of rubber over toe and heel counter; padded ankle; lug sole. Sizes 5-12; width medium. **B210** ave. wt. 3¼ lbs. \$ 28.00

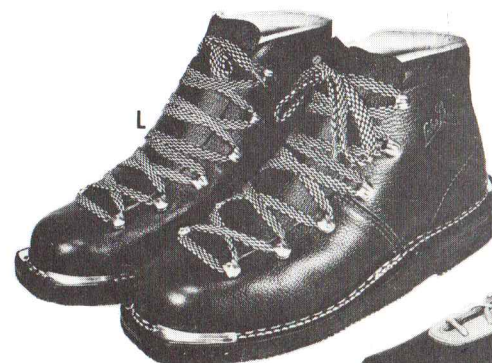

J HIVERNALE. A double boot with two sets of inner boots. The "arctic" inner is felt on the lower and leather on the upper exterior, fully lined with synthetic fur. The "alpine" inner has a black leather exterior and is lined with felt. Outer boot is smooth black leather with closely trimmed lug soles and is so lightweight that one can climb in it as well as in a single boot. Hinged heel. Lacing rings. For technical climbing in very cold weather, this boot could save your toes. Sizes 5½-12; medium width. **B401** ave. wt. 6½ lbs. \$ 70.00

KLEPPER FOLDBOATS have been sailed across the Atlantic Ocean twice—a marvelous feat for a boat that can be carried by one man, stowed in the trunk of a car, and erected in 15 minutes. The secret is in the Klepper engineering. This remarkable craft has been in the process of perfection for over 50 years. The individual parts, straight-grained mountain ash with anodized aluminum fittings, lock into a tight and flexible framework. The hull is a tough laminate of rubber and canvas, fitting perfectly over the frame. Undoubtedly the finest of their breed, Klepper foldboats have been a standard on many expeditions to the Arctic and Tropic regions of the world. They are guaranteed for three years. With proper maintenance, Klepper hulls have a life expectancy of at least 15 years and some have exceeded 30 years.

KLEPPER AERIUS DOUBLE-SEATER. In 1956, Dr. Hans Lindeman crossed the Atlantic Ocean sailing a standard Klepper Aeriis. This outstanding accomplishment was featured in the July 22, 1957, Life Magazine cover story. This 17' 1" kayak can be used as a sailboat or paddled. Amazingly compact, it folds into 3 luggage-like packbags and easily fits into the trunk of a car. Patented built-in airspoons make the Aeriis completely unsinkable even when fully loaded and filled with water. Cross ribs are of 9-layer cross-laminated Finnish Birch; guaranteed against warping or disconnecting. Girder construction provides exceptional strength and the kayak-shaped hull is the fastest and most seaworthy of hulls. Assembly is simple and takes approximately 15 minutes due to the tough, anodized snap-lock fittings which will not corrode. Equally at home in white water, pounding surf, shallow marshes and lakes. Weighs only 64 lbs.

K001 wt. 64 lbs. **\$390.00**

SAILING EQUIPMENT FOR AERIUS DOUBLE-SEATER. Strong Dacron sails. 55' of sailing area. Roller reefing feature for manageability. Can be sailed easily by one person. Strong alloy mast is 9' 2". Includes boom, gaff, battens, footpedal, rudder assembly, leeboards with crossbar, fittings, packbag.

KS001 wt. 19 lbs. **\$180.00**

K100 .. Aeriis II complete w/dacron sailing eqmt. **\$538.00**

KLEPPER AERIUS SINGLE. For the lone wolf who prefers solo voyages yet insists on the advantages and safety features characteristic of all Klepper foldboats. Excellent maneuverability. Performs well in tricky shallow waters. Unsinkable. Overall length: 15 ft.; beam: 29". Packs into 2 packbags. Equipment includes: built-in air tubes, seat and cushion, swivel backrest and cushion, utility bag, double bladed touring paddle with drip rings, packbags and service kit.

K002 wt. 54 lbs. **\$315.00**

KLEPPER MASTER FOUR-SEATER. Three top action crafts in this one versatile foldaway. Excellent performance as a sail sloop, motor boat or rowboat. Rugged hull is of 5-layer vulcanized natural rubber and longhemp. Deck is of laminated Mountain Ash, Finnish Birch and African Mahogany. Built on the I-beam girder-and-arch principle for strength and stability. 3 built-in airspoons for safety and seaworthiness. Boat is unsinkable. Strong transom permits choice of motor sizes to 18 hp. Packs into three handy packbags. Boat is 11' 10" long, with a 4' beam. Needs little or no care; no hauling or trailering; no docking fees; no storage problem. Equipment includes two adjustable seats; wavebreaker of Astralon; metal flagstaff and flag; set of 3 packbags; one auxiliary paddle; and service kit. Silver grey hull and marine blue deck.

K003 wt. 108 lbs. **\$530.00**

SAILING EQUIPMENT FOR KLEPPER MASTER. Trouble-free Dacron sails with 77 sq. ft. of sailing area. Height of 2-section mast is 15' 11". Sailing equipment includes boom, battens, leeboards with crossbar, rudder assembly with tiller, lines and attachments, and packbag.
KS003 wt. 43 lbs. \$320.00

K103 Master complete w/dacron sailing eqmt. \$840.00

KLEPPER TRADEWIND. The only foldaway ever made solely for sailing. 95 sq. ft. of strong Dacron sails produce fantastic speed. Adjustable centerboard allows close-to-wind sailing, prevents drifting. Jam cleats on coaming speed up handling of jibsheets. Four stainless steel stays provide strong bracing for mast. As with all Klepper foldaways, the Tradewind is guaranteed unsinkable due to built-in air tubes along gunwales. Folds into 5 handy packbags (4 for boat, 1 for sails). Ready to sail equipment includes: framework and hull with built in air tubes; 2 seats, wavebreaker, service kit, 3 section mast, boom, adjustable centerboard, rudder assembly, Dacron sails, all fittings, stainless steel shrouds, packbags.

For years we of THE SKI HUT staff have urged your active support of local and national conservation organizations. Conservation has never been a "popular" cause (a man with only two eyes and two ears is both blind and deaf). Under the newly polished aegis of Ecology, the principles and ideals formerly the concern of conservationists have been taken up with the enthusiasm generated by a "new" movement.

We are, of course, pleased by this interest and support in and of conservation-ecology. Ecology is fashionable this year and gives indications of becoming the latest fad. Fads, however, are characterized by a dissipation of energies and a short term of tremendous vitality giving way to a greater apathy. This must not happen—the stakes are too high. This is where the organizations listed below are invaluable. They know who the spoilers are and they know how to direct the battle. We urge you to stand up and be counted—offer your support—and join those who are fighting to save what is left.
